

A product of POLYCON INDUSTRIES
ISO 9001:2015 Certified Company

Wide collection of **Moulded Furniture**

About Polycon Industries

POLYCON INDUSTRIES, Estd. in 1999 by Mr. Bhikham Chand Agarwal, an entrepreneur by his own rights, dreamt of establishing his own industry started with manufacturing Water storage tanks by Roto moulding procedure with the brand name POLYCON.

With efflux of time, he brought in modern machineries for manufacture of PVC pipes and marketed under the same brand name of POLYCON. Consequent to the sad demise of Mr. Bhikham Chand Agarwal, his younger brother, Mr. Pramod Agarwal, who being an innovator and visionary himself, took upon the onerous responsibility of the industries onto him and within short span of time expanded further by setting up another unit christened as POLYCON FURNITURE unit by the year 2010, where all types of economy range plastic moulded furniture like chairs, dining tables, tea tables, baby chairs, stools, etc. were produced and are still marketed successfully.

By the year 2013, Pramod Agarwal added another feather to his cap by being declared as the pioneer in manufacturing of BLOW MOULDED WATER STORAGE TANKS, the first of its kind in the entire NORTH-EAST region, where for the first time, the brand name PLUTON was introduced to our company.

Both POLYCON and PLUTON have become household names, not only in Assam but many parts of North-East India, West Bengal, Orissa, Uttar Pradesh, Bhutan.

With the addition of 100% Virgin Plastic Moulded Furniture and household items, by the name of PLUTON, our company hopes to reach the yet unexplored regions of Eastern India and beyond by promising not only international designs, good quality products but also a huge range of attractive colours with each product.
